

About Children's Dental Health

Who is Children's Dental Health?

Children's Dental Health is a leading, regional provider of pediatric dental services. Our dentists and dental staff are knowledgeable, passionate, and specially trained to provide the best dental care possible to every child, including those with special needs. We strive to make children feel calm and comfortable during their visit with the dentist. We also provide a fun atmosphere where children can play and be entertained by toys, books, video games, and movies before being seen by the dentist.

What is the difference between a pediatric dentist and a family or adult dentist?

Pediatric dentists offer a unique and necessary set of skills and expertise. Making up only 3% of all dentists in our country, pediatric dentists have additional specialty training and are better equipped to meet the needs of young patients. Their education includes training in child psychology and treating children who have special needs or who are medically compromised. Pediatric dentists are skilled at using smaller equipment designed for a child's mouth and better understand the intricacies and importance of baby teeth in a growing child. They also focus more attention on educating patients and parents about preventive care to help children avoid complications such as decay, infection, speech problems, and cosmetic issues. Furthermore, Children's Dental Health completes a detailed risk assessment on each patient to identify and provide additional support and services to the children who need it the most.

Where are you located?

Children's Dental Health has more than 20 locations throughout the region. Practice locations include:

Pennsylvania

- Aston
- Bensalem
- Chadds Ford
- Downingtown
- Drexel Hill
- Easton
- Exton
- Harrisburg
- West Grove
- Lancaster
- Limerick
- Mechanicsburg
- Media
- Trexlertown
- Plymouth Meeting
- South Philadelphia
- Warrington
- West Philadelphia
- Wyomissing
- York

What services do you offer?

Our services include general check-ups, oral hygiene cleanings and education, digital x-rays, metal-free fillings, dental sealants, fluoride treatments, extractions, crowns, pediatric orthodontics, sleep dentistry, and emergency services, such as treating cracked or broken teeth, tooth aches, and other trauma to the mouth. When more invasive restoration is required, we refer patients to Children's Dental Surgery, where our doctors can more safely perform sleep dentistry in a comfortable, hospital-like setting.

What types of insurance does Children's Dental Health accept?

Children's Dental Health accepts most major insurance plans, including Aetna, Amerihealth Caritas, Avesis, Cigna, Delta Dental, DentaQuest, Humana, Keystone First, Metlife, United Concordia, United Healthcare, and Medicaid and CHIP programs.

Parents can visit ChildrensDentalHealth.com or call us at **(866) KIDS-DENTAL** to determine if their insurance plan is accepted by our practice.
